CHRISTIAN COUNSELING

“Eating Disorder Treatment”

Interactive workshop for licensed counselors and social workers

Learning Objectives:

- Understanding how the framework of a bio-psycho-social model informs the assessment, diagnosis and treatment of eating disorders.
- Application of the assessment tools and pertinent treatment interventions in providers' clinical settings.
- Incorporate the constructs of the bio-psycho-social model in an experiential opportunity to assess a case in an interactive dialogue with facilitator.

"working toward emotional wholeness cannot be formulaic; healing and recovery are achieved when there is a strategic plan which is jointly mediated by the therapist and the client who both submit to God's ultimate treatment plan."

Mary S. Pabst, LCSW-C, is a clinical social worker who has maintained a private practice for 30 years. She is the Founder and Past President of The National Eating Disorders Association, and is affiliated with The Academy for Eating Disorders and The Washington Society for the Study of Eating Disorders and Obesity.
